Infrastructure www.peer1.com

Frank DiRocco

Associate Product Manager Peer 1 Hosting

Peer1 delivers a turn-key optimized platform that enables Magento Solution Partners to quickly implement the infrastructure needed to deploy an optimized & scalable Magento store with a clear path toward high-availability as customer loyalty grows.

What makes a good hosting partner that enables a customer to scale?

A hosting partner needs to be familiar with Magento and it's underlying necessity for caching systems. These cache systems must be implemented in order to optimize the store's response times. The hosting partner should understand and emphasize the relationship between the Hosting Partner and Solution Partner as one that focuses on the Platform and Software needs of the Store Owner, so they can focus on the needs of their business
